SRIMOYEE BERA

QA Automation Engineer | Playwright & Selenium WebDriver | SDET
Howrah, West Bengal 711201 | srimoyee1211@gmail.com | +91-8777691856 | LinkedIn

PROFESSIONAL SUMMARY

QA Automation Engineer with 4+ years of experience in QA and software testing, including hands-on work building and maintaining test automation frameworks with Playwright (JavaScript) and Selenium WebDriver (Java). Increased automated regression coverage from ~50% to ~75% and cut manual regression effort by ~60%, contributing to an 80–90% reduction in post-release production defects. Skilled in designing maintainable Page Object Model (POM) frameworks, test planning and strategy, API testing, integrating automated tests into CI/CD pipelines, and enforcing rigorous defect tracking in JIRA. Recently built a full-stack AI-powered web app (React, Next.js, Node.js) as a personal project, applying a test-first mindset to development. Recognized twice with Cognizant's "Doing the Right Thing" award.

TECHNICAL SKILLS

Core Fundamentals: Test Automation Frameworks • Page Object Model (POM) • Regression & Functional Testing • Test Planning & Strategy • Test Case Design • STLC & SDLC • API Testing • Cross-Browser Testing • CI/CD Integration • Defect/Bug Management • Agile/Scrum

Tools & Technologies: Playwright • Selenium WebDriver • TestNG • Cucumber (BDD) • Rest Assured • Postman • Java • JavaScript • SQL • HTML • Maven • Git/GitLab • JIRA • IntelliJ • Eclipse • VS Code

Development & AI: React • Next.js • Node.js • REST APIs • SQLite (Drizzle ORM) • Vitest • GitHub Actions • LLM APIs (Gemini, Claude)

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions — Programmer Analyst, QA Automation Engineer *July 2022 – Present*

- Designed and maintained UI automation scripts with Selenium WebDriver (Java) and Playwright (JavaScript), plus API automation in Java, raising automated regression coverage from ~50% to ~75% across 2 core modules.
- Built end-to-end Playwright test suites using the Page Object Model (POM) design pattern, cutting manual regression testing effort by ~60% and reducing regression cycle time from 5–6 days to under 2 days.
- Integrated automated test suites into CI/CD pipelines, running full regression suites (~2–3 hour runtime) 2–3 times per release to support faster, more reliable release cycles.
- Executed manual and automated cross-browser testing (CBT) across Chrome, Firefox, and Edge, ensuring consistent application behavior across multiple releases.
- Logged and tracked an average of 4–5 defects per sprint in JIRA, collaborating with a cross-functional QA team of 10–12 to troubleshoot root causes and reduce defect leakage ahead of release.
- Executed regression and functional test suites across application modules, contributing to an 80–90% reduction in post-release production defects while cutting manual regression effort.
- Partnered with developers and product owners across Agile ceremonies and supported production releases for 2 application modules, delivering release cycles with minimal post-release defects.

KEY PROJECTS

JobTrackr AI — Full-Stack Job Application Tracker with AI Assistant | GitHub

Next.js, React, Node.js, SQLite (Drizzle ORM), Gemini/Claude API, Zod, Vitest, Playwright, GitHub Actions

- Built a full-stack web app with JWT authentication, a drag-and-drop Kanban pipeline, and an analytics dashboard, using server-side validation (Zod) and per-user authorization on every action.
- Integrated LLM APIs behind a provider-agnostic layer to score resumes against job descriptions and generate cover letters; added hash-based result caching, retries with exponential backoff, and model fallback for 503 errors.
- Wrote 30 unit tests (Vitest), a Playwright end-to-end suite covering the full user journey, and GitHub Actions CI running tests and builds on every push.

End-to-End Regression Automation Suite

- Designed a cross-browser regression suite (Login, Search, Browse, Product Details) using Selenium WebDriver, Java, TestNG, and POM, extended with Playwright (JavaScript) and Maven, and integrated with GitLab CI/CD.
- Enabled automated execution 2–3 times per release across Chrome, Firefox, and Edge, supporting faster, more frequent releases.

EDUCATION

Bachelor of Computer Applications (BCA) *2019 – 2022*

Institute of Engineering and Management | GPA: 9.16/10

CERTIFICATIONS

Claude Certified Architect – Foundations (Anthropic) • Build with Gemini (Google Cloud) • Introduction to Generative AI (Simplilearn)
